KILLER DOLPHIN JUMBO

THE BEST CHOICE Preferred by professionals

Roller KILLER 330 series from Blue Dolphin is a roller cover made from innovative material - microfiber blend - which absorbs and releases the paint and no fiber is left. The advantage of this roller is its uncomplicated assembly. Keeps its fluffiness after multiple use. Due to the cuts at the edges roller leaves no thick edges.

Advantages of KILLER:

- Good rolling - doesn't slip when painting
- Can be used for variety of paints: acrylic, latex, oils, both with matt and sheen effect
- Highly technological innovative filament
- Strong polypropylene tube, resistant to paint removers

Application:

9 mm pile:

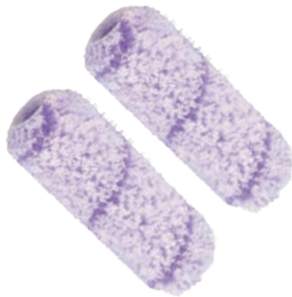

- Surfaces: smooth
- Painting effect: extra smooth

13 mm pile:

- Surfaces: semi-smooth, semi rough
- Painting effect: smooth

PRODUCT CODE	SIZE	PILE	SURFACE	QUANTITY (pcs/case)

SPINNER DOLPHIN JUMBO

Roller SPINNER 330 series from Blue Dolphin is a roller cover made from innovative material - polyester blend - which absorbs and releases the paint and no fiber is left. The advantage of this roller is its uncomplicated assembly. Keeps its fluffiness after multiple use. Due to the cuts at the edges roller leaves no thick edges.

Advantages of SPINNER:

- Good rolling - doesn't slip when painting
- Can be used for variety of paints: acrylic, latex, oils, both with matt and sheen effect
- Highly technological innovative filament
- Strong polypropylene tube, resistant to paint removers

Application:

9 mm pile:

- Surfaces: smooth
- Painting effect: extra smooth

13 mm pile:

- Surfaces: semi-smooth, slightly rough
- Painting effect: smooth

ATLANTIC^{DOLPHIN} JUMBO

FACADE - abrasion-resistant

For hard to paint surfaces like: stucco, brick, concrete

Roller ATLANTIC 330 series from Blue Dolphin is a roller cover made from innovative material - polyamide blend-which absorbs and releases the paint and no fiber is left. The advantage of this roller is its uncomplicated assembly. Keeps its fluffiness after multiple use. Due to the cants at the edges roller leaves no thick edges.

Advantages of ATLANTIC:

- Good rolling - doesn't slip when painting
- Can be used for variety of paints: acrylic, latex, oils, both with matt and sheen effect
- Highly technological innovative filament
- Strong polypropylene tube, resistant to paint removers

Application:

- **12 mm pile:**
- Surfaces: semi-smooth/slightly rough
- Painting effect: orange peel effect

18 mm pile:

- Surfaces: rough
- Painting effect: textured

PRODUCT CODE	SIZE	PILE	SURFACE	QUANTITY (pcs/case)

SILVER^{DOLPHIN} JUMBO

SUPER EFFICIENT plaster, parget, brick, wood

Roller SILVER 330 series from Blue Dolphin is a roller cover made from innovative material - microfiber twist - which absorbs and releases the paint and no fiber is left. The advantage of this roller is its uncomplicated assembly. Keeps its fluffiness after multiple use. Due to the cants at the edges roller leaves no thick edges.

Advantages of SILVER:

- Good rolling - doesn't slip when painting
- Can be used for variety of paints: acrylic, latex, oils, both with matt and sheen effect
- Higher absorbance and better release of the paint
- Uncomplicated inner assembly system
- Highly technological innovative filament
- Strong polypropylene tube, resistant to paint removers
- Keeps its fluffiness after multiple use
- Due to the cants at the edges roller leaves no fat edge

Application:

- **20 mm pile:**

330 JUMBO Paint Tray

The 330 series painting tray is made of high-quality plastic, resistant to mechanical damage. It consists of two parts: a paint reservoir and an inclined shelf with tabs, designed to remove excess paint from the roller. It ensures an even distribution of paint on the roller surface. Fits rollers with a width of 37 cm and 45 cm.

Features of the Series 330 Blue Dolphin Paint Tray:

- High quality material
- Solvent resistant
- 8 liter capacity

One handle - many possibilities

Paint Tray Cover for the JUMBO Painting Tray

Paint tray covers greatly facilitate painting work, as they save time and water spent on washing the paint tray after use. Additionally, they can be tightly sealed, which helps prevent the paint from drying out.

Benefits:

- You do not need clean the paint tray when changing color
- You do not run the risk of splashing your room
- You do not pollute the environment with paint by washing the paint tray

You are saving:

- 20-30 liters of water that would be used to clean the paint tray
- Time spent washing the paint tray before using it for the next color
- The cost of purchasing an additional paint tray

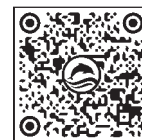

PRODUCT CODE	SIZE	QUANTITY (pcs/case)
CJT_58379	53 x 37 cm	12/36

330 Paint Tray

The Blue Dolphin Paint Tray is perfect for storing paint during painting work and for evenly distributing it on the roller surface. Thanks to the sloping, grooved surface, excess paint can be squeezed from the roller, which then flows into the tray. The Blue Dolphin Paint Tray is easy to clean and resistant to solvents. It is recommended for use with the Blue Dolphin Paint Grid.

Features:

- Solvent resistant
- For all types of paint
- Available in three sizes
- Easy to clean

PRODUCT CODE	SIZE	QUANTITY (pcs/case)
KM330_59796	17 x 30 cm	15/75/28

Paint Tray Refills

The Blue Dolphin Paint Tray Refill allows for greater efficiency in completing painting projects by eliminating the need to clean paint trays between new colors, coats, or at the end of a painting session.

Features:

- Ideal, one-time use tray liner
- Perfect for painting rooms using multiple colors
- Saves time of cleaning

Vapour Permeable Non-Woven Tape

Vapour Permeable Non-Woven Tape used to connect smooth and rough surfaces. It is used for joining or repairing foils, nonwovens and membranes (PP). The tape for vapor-permeable films has a strong adhesive. The tape is made on a non-woven backing, rubber-based glue, while the spacer is made of siliconized paper.

The tape has excellent adhesion to many surfaces:

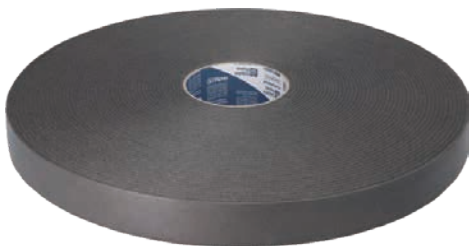

- Polyethylene foils
- Polypropylene
- Nonwovens
- PP membranes
- Steel
- Glass
- Foamed EPS

PRODUCT CODE	SIZE	QUANTITY (pcs/case)
TFPPJ_05939	50 mm x 25 m	7/60

Acoustic Tape

Blue Dolphin acoustic tape is produced on the basis of polyethylene foam. The acoustic tape allows to reduce the impact of vibrations, to which it effectively mutes drywall systems. It is also used in construction and renovation works when installing aluminum profiles to cushion and insulate contact surfaces.

- Excellent noise reduction properties
- Acrylic adhesive
- Soft and flexible backing
- Rotting resistant

Tile Tape

The innovative Tiler's Tape for supporting tiles during installation is an invaluable tool even for the experienced professionals. This unique tape, thanks to the use of a special adhesive (strong GRIP), helps to stabilise the tiles at 90° joints, for example, when covering flush-mounted frames, wall shelves and recesses. Its resistance to mechanical damage and to moisture allows for use in challenging working conditions, and its guarantee of leaving no adhesive residue gives an excellent final result.

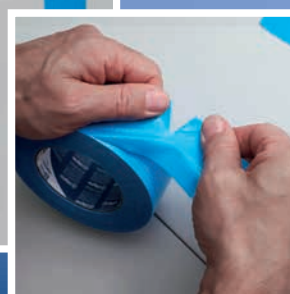

Properties of the Blue Dolphin Tile Tape:

- Leaves no adhesive residue
- Resistant to moisture
- Resistant to mechanical damage
- Easy to tear
- Strong GRIP

Paper and foil dispenser

The Blue Dolphin DS 330 dispenser is used to connect tapes with paper or painting foil. It is irreplaceable when protecting rooms before painting, plastering and other renovation and finishing works. The DS 330 dispenser can be used with various types of painting tapes (Blue Dolphin tapes or Washi tapes) and plastering tapes with painting paper or foil of various widths. The DS 330 dispenser is made of high-quality plastic with an ergonomic handle, which makes it extremely easy to use. The durable mechanism that connects the tape to paper or foil ensures long-term use.

The replaceable 35 cm long cutting blade precisely cuts connected tape and paper or foil. Dedicated for tapes' width: 19mm, 25mm, 30mm, 38mm, 48mm

Benefits of the DS 330 dispenser:

- Ease and speed of combining the tape with paper or foil
- Time savings due to quick surface protection
- Premium material quality for professionals
- Replaceable cutting blade
- To protect all surfaces

**STAINLESS STEEL
ACID-RESISTANT**

BLUE DOLPHIN Finishing Skimming Spatula

High-quality skimming spatula used during finishing works. An ergonomically designed handle, comfortable to hold during long hours of work, durable PVC. Flexible and replaceable. Straight blades made of flexible stainless steel with a thickness of 0.3 mm and a hardness of 2200RM enable both leveling the plaster and spreading the mass with a very thin layer.

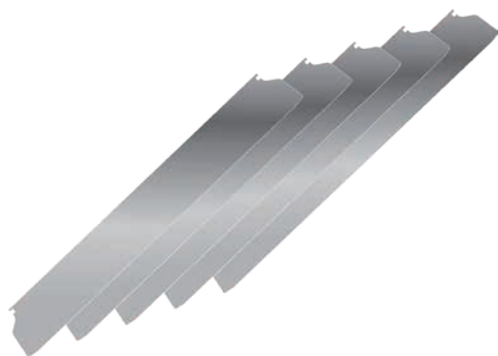

Application

BLUE DOLPHIN Finishing Skimming spatula designed for professionals, for finishing & smoothing, walls & ceilings, Plastering & special finishes, plastering. For those who wants perfect preparation of the substrate for painting.

Advantages:

- Lightweight with an ergonomic handle with a non-slip surface
- Easy to clean - professional workmanship prevents the adhesion of gypsum residues
- The special design prevents the blade from falling out during operation
- Available in five sizes: 250 mm, 400 mm, 600 mm, 800 mm, 1000 mm

Render Tape and **Rough Surface** Blue Dolphin is designed to protect rough and demanding surfaces like: stucco, stone, concrete, brick. Adapted to long-term exposure to external factors with ability to easily peel with no residues or damages.

Blue Dolphin **Painter's Tape** is the best choice for professionals and DIY enthusiasts looking for clean edges and easy-to-use tape. It has all the advantages of the best masking tape – thin crepe paper, prevents the paint from bleeding, and the specially developed formula remains UV resistant for up to 14 days. Available in a dedicated indigo color.

The Blue Dolphin **WASHI Tape** Japanese painter's tape is produced exclusively from rice paper, which makes it very thin and at the same time extremely durable. This tape is perfect for sharp paint lines between two or more colors.

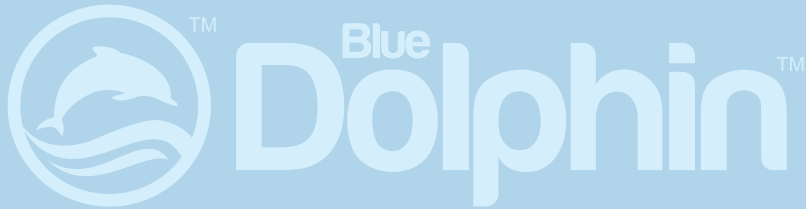

DTPRW_63489	RENDER TAPE 10 mm x 50 m (30/200)

MIXING PADDLES

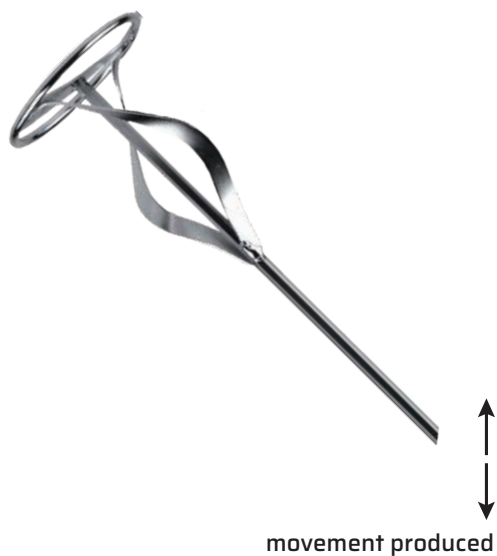

Dedicated to devices with a chuck, the tool must be inserted all the way to a loose chuck and immobilized by pressing the jaw rotating outer ring (in the case of fast clamping chuck appropriate tool should be placed in the tool holder and tightened a quick drill).

Dedicated to devices with running SDS. SDS consists of two oval recesses for fastening tools and two grooves, which edges transmit the torque. The instrument should be insert into the chuck and twisted until it locks independently..

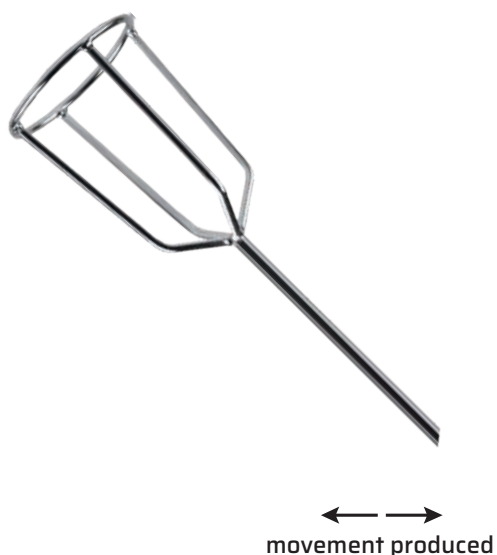

Dedicated to devices with a thread. Fixing is carried out directly on the spindle of the device. The tool should be screwed into the device by hand, tightening occurs spontaneously during operation.

Paint Mixing Paddle

Emulsion paints, acrylic paints, lacquers, varnishes, other liquid materials.
